EDUCATION

B.Tech (CSE)

Bhagwan Parshuram Institute of Technology - GGSIPU

2012 - 2016

74.30

Higher Secondary

D.A.V. Public School –CBSE

2011 - 2012

78.80

Secondary

D.A.V. Public School –CBSE

2009 - 2010

85.50

SKILLS

- Java
- React.js
- Redux
- Spring Boot
- Hibernate
- Rest API
- SOAP
- Micro Services
- HTML/CSS
- JavaScript
- MongoDB
- SQL
- Mockito
- JUnit
- GIT
- AWS
- CI/CD

PROFILE

Seasoned full-stack developer with 8+ years of hands-on experience looking for a senior developer role. Adept in requirements gathering, planning, designing, and deployment. Demonstrated proficiency across diverse sectors including travel, banking, insurance, and supply chain.

WORK EXPERIENCE

Software Developer
ITS - Internet Travel Services

11/2022 – 04/2025

- Independently set up private blockchains for Hyperledger from scratch on AMB. Implemented smart contracts for loading and retrieval of business data into the blockchain using Go and Node.js
- Led end-to-end development and maintenance of travel and expense features utilizing Java and React.js and REST APIs.
- Developed dynamic and responsive user interfaces using React.js, reducing page load time by 30% through component-level optimizations.
- Demonstrated complete ownership in architecting, implementing, and enhancing functionalities within the travel domain.

Senior Software Engineer
ChainThat

10/2020 – 11/2022

- Restructured the frontend from scratch using React.js for enhancing application performance.
- Led a small team of developers in the design, development, and deployment of scalable backend services using Java, Spring Boot, Hibernate ensuring adherence to coding standards and best practices.
- Translated complex client requirements into clear and comprehensive technical documentation and collaborated closely with BAs to refine feature specifications, with QAs for test planning and validation, with DevOps to ensure seamless integration and CI/CD pipeline execution.
- Integrated Redux for state management across complex UI workflows and refactored code into reusable functional components with React Hooks.
- Enhanced code efficiency with coverage by over 90% through strategic optimizations and test scenario management.

Software Developer
Accenture

03/2017 – 10/2020

- **Hardware Supply Chain Management System**: Blockchain application handling the exchange of hardware supplies amongst multiple parties. Handled the development of Smart contracts, unit testing and deployment on the Ethereum network using using Solidity, JUnit, Truffle, Ganache.
- **MDE (Multipurpose Document Exchange)**: Web application to manage transmission, authentication of documents. Responsible for analysis, preparing TAs and end-end development of features utilizing Java, Spring Boot, Hibernate, Rest API.
- **MIFID II**: Application designed for bankers and customers for processes associated with policies & funds, customer authorizations. Involved with end-end development using Java, Spring Boot, Hibernate, SOAP, DB2.
